

# POLYURETHANE AND ACRYLIC COLORING AGENTS

Our pigment pastes for PU and Acrylics are intended to color various liquid products of the COP range, such as polyurethane resins and foams, ERGOPEAU / ERGOFLEX paints and acrylic resins of the COPACRYL range.

These pigment pastes are made of a pigment powder mixed in a liquid compatible with PU and acrylics.

We recommend not to put more than 2% weight of paste in the resin or paint because it could have a plasticizing / demolding action, reducing any possibility of adhesion.

## Characteristics

	BLACK	WHITE	RED	GREEN	YELLOW	ORANGE	BLUE
Concentration	15%	68%	30%	40%	30%	40%	35%
Heat stability	> 200°C	> 200°C	> 200°C	> 200°C	> 200°C	> 200°C	> 200°C
Migration resistance	5	5	2	5	5	5	4
Light resistance	8	8	6	7	7	8	8
Weather resistance	/	/	/	/	3-4	4-5	5

## Storage

Do not store at temperatures <5°C or >30°C.

## References & Packaging

Our coloring pastes are guaranteed for 18 months. They are available under the following references:

COLOR	PACKAGING	REFERENCES
Flesh color	250g	CPU C01
Dark flesh color	250g	CPU CF1
Black	250g	CPU N01
White	250g	CPU BL1
Red	250g	CPU R01
Green	250g	CPU V01
Yellow	250g	CPU J01
Orange	250g	CPU O01
Blue	250g	CPU B01
